

Marijn Saedt

Student

I am a 22-year-old Embedded Systems Engineering student at HAN University of Applied Sciences. I am a social and driven person who is curious and eager to keep learning beyond my previous Electrical Engineering education. I am reliable and enjoy working in a team.

After my prior education in Electrical Engineering and I am broadening my experience through my current Embedded Systems Engineering studie. I have gained experience in areas such as PCB design, programming in multiple languages, working with microcontrollers, and producing professional documentation, among others.

Education

- **HBO Embedded Systems Engineering**
2023 - Present
HAN Arnhem
- **MBO Electrical Engineering**
2019 - 2023
ROC Nijmegen
- **VMBO-T**
2015 - 2019
NSG Nijmegen

Strengths

- Reliable
- Social
- Communication
- Bilingual
- Patient

Hobbies

- Cooking
- Playing Guitar
- Home automation
- Gaming
- Concerts

Experience

- **2018 - Present**
BLUF.
Been working since I was 15. I am not only a cook but I also guide colleagues with disabilities.
- **2023 - 2023**
Quintess
Summer job after internship
- **2021 - 2022**
Contecto
Summer job after internship
- **2020 - 2020**
Verhulst
Summer job after internship
- **2019 - 2019**
Pluryn
living room assistant
Helped people with disability's to clean make coffee

Internships

- **2023 - 2023**
Quintess
Designed a room state module to detect temperature, humidity and presence communicating via LoRa and BACnet to a PRIVA controller.
- **2021 - 2022**
Contecto
Soldered and tested PCBs including THT and SMD techniques
- **2021 - 2021**
Cumulus
Constructed products
- **2020 - 2020**
Verhulst
Helped design a testing system that tests the resistance of wires that were used in the machines to prevent problems.
